

When life breaks, what still holds?

One morning Sonny Saggar was a respected physician who had run a hospital and built businesses. By one o'clock that same day it was over. Indicted, and later incarcerated, he lost the career, the standing, and nearly everything he had spent thirty years building.

A friend, an English judge, put it simply: he was just walking along, and he fell down a manhole. This kind of thing happens to people. The only real difference between us is how we climb out.

GROUND is what he found at the bottom. Begun by hand inside a federal prison camp and finished after his release, it is a short, clear book about the one thing no one can take from you, and how to build your life on it before the ground gives way, as it does for everyone eventually.

It is not about prison, and it is not about being a doctor. It is about the quiet self underneath the titles and the reputation and the regard of others, the self still there when all else is stripped away. Whether you face a divorce, a diagnosis, a cell, a public disgrace, or simply a long and ordinary bad day, this book was written to help you stand up.
